

# Golden Cube

**a.k.a. Gold Cube**

*Designed by Tony Fisher, purchased from Meffert's, 2009.*

(plastic with metallic finish, 3.1 inches;  
made in a number of colors in addition to gold,  
including silver shown above, copper, white, black)

A *Skewb* mechanism with sections offset; makes a big mess when it is mixed up. In the same spirit as the *Rubik 3x3x3 Mirror Block*, pieces of the cube are distinguished by shape rather than color.
