

Crazy Megaminx

Purchased from Mefferts, 2011.
(plastic, 3.1 inches from face to face)

In the same spirit as the generalization of *Rubik's Cube 3x3x3* to the *Crazy Cube 3x3x3*, this is a generalization of the *Megaminx*. Shown above is Meffert's "Saturn" version, where for each pair of opposite faces, one rotates around the circle in the center (denoted on the packaging as a "0") and for the opposite side the circle rotates with the face (denoted on the packaging as a "1"); the faces and their colors are:

white = 0 opposite gray = 1,
red = 1 opposite orange = 0,
green = 1 opposite light green = 0,
blue = 1 opposite light blue = 0,
light yellow = 0 opposite yellow = 1,
pink = 0 opposite purple = 1

Like the *Crazy Cube 3x3x3*, Meffert's also has produced different move restriction variations, with names of the planets (Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, and Neptune).
