

# Rubik's Color Blocks

*Copyright Winning Moves Inc. 2020.*

(plastic 2.25 inches square, white opposite yellow, green opposite blue, orange opposite red)

A version of the standard *Rubik's 3x3x3* cube, and although any solution for the standard *Rubik's 3x3x3* Cube can be used, the jumbled shape it takes when mixed up can make it much harder to perform a solution. For an even harder version of this puzzle to visualize while solving, see the *Rubik 3x3x3 Mirror* cube that has all faces the same color.

Here are photos of the other sides of the puzzle, the puzzle shape as shipped, and starting with a clean *3x3x3* cube, what it looks like after just the three moves R F R-:
