Welcome to Quirkle

We take classic toys and gadgets and re-engineer them into super-performance devices. Hi-tech toys if you like. Conversation pieces if you prefer. They are fascinating to play with and a challenge to analyze how they work.

Products

 Quark	 Quzzle	 Quagnet
		
The highest performance classic spinning top in the world. Common tops spin. This one spinsssssssss.	The sliding block puzzle designed on a high speed computer by exhaustive search. The one configuration among ten's of thousands that looks amazingly simple yet will leave you scratching your head.	The neodymium magnet stack that does a dozen cool tricks. For people who like something to fidget with.

[SlidingMagnets™](#) - a FREE "virtual toy" that simulates a metal disc sliding on a frictionless bed of air thru magnetic fields. If you ever played air-hockey you have seen how a plastic disc can smoothly glide on a bed of air. Now imagine that the disc is metal and that there are scattered magnets attached to the underside of the air table. What path will the disc take?

[DIY CD sleeve](#) - a free guide to making CD sleeves from plain paper.
